About me

Frontend developer with more than two years of experience creating scalable digital products with React, Node.js, Express and MongoDB. I have worked in agile environments developing modern web interfaces and functional backend, collaborating with design teams in Figma and applying Git and version control best practices. I have knowledge in SSR with Next.js, technical SEO optimization and AI tools like ChatGPT and GitHub Copilot to improve productivity. I am a self-taught person, focused on continuous improvement, with intermediate English for technical documentation and global teamwork.

My Experience

Soferco SAS

Frontend Developer

Buga-Colombia

09/2024 - 12/2024

- Implemented web scraping tools with Python for market analysis and real-time price updates. Maintained logistics and inventory systems using Node.js, React and MySQL, improving operational efficiency.
- Integral support (software and hardware) to operational areas.
- **Technologies:** React, Node.js, Express, MySQL, GitHub, REST API, Python.

Nostalhit Music Group LLC

Frontend Developer

USA

10/2023 - 04/2023

- Managed and developed the website for Nostalhit Music Group, LLC, using Next.js with a focus on web services and object-oriented programming. Implemented efficient version control through GIT, ensuring code integrity and facilitating collaboration within the development team.
- **Technologies:** React, MySQL, API, Node JS, Express, REST API, Git, GitHub, Wordpress.

Alcaldía de Santiago de Cali

Frontend Developer

Cali - Colombia

09/2023 - 12/2023

- I developed SATIC's website, combining creativity and UX/UI design principles, employing advanced data visualization techniques to improve real-time decision making and environmental monitoring.
- I successfully deployed a complete application suite on an Ubuntu server, with a NodeJS backend, a ReactJS frontend and a React Native mobile app, ensuring seamless integration and high performance across multiple platforms.
- **Technologies:** React, MySQL, Node Js, Maps layers, NextJs, PHP

National Learning Service CAB

Frontend Developer

Buga -Colombia

11/2022 - 05/2023

- I analyzed and systematized the beer tasting process at SENA, improving decision making by creating a systematic approach to beer tasting procedures, ensuring consistency and accuracy in evaluations. I used a microservices architecture resulting in interfaces that streamlined the process, improving efficiency and data management.
- **Technologies:** Next.js, PHP, JavaScript, jQuery, HTML, CSS, MySQL, GitHub

Education

National Learning Service CAB

Software Analyst and Developer Technologist

Buga

01/2017 - 01/2019

Platzi

Full Stack Developer with Javascript

Platzi

02/2024
